

# PRO-VAC

## INDUSTRIAL PUMPOUT SYSTEM

- \* Available in steel or light weight aluminum.
- \* 60 gallon tank, approximately 55 gallon capacity.
- \* 24" wide fits through any standard door.
- \* 48" height fits through a cargo van door.
- \* Hand brake is standard for safe handling when full.
- \* 20 feet of 2" suction hose and wand standard with unit.
- \* 13.4 amp vacuum pump unit plugs into any 15 amp service.
- \* Electronic shut off will shut the unit off automatically when full.
- \* Heavy duty front casters.
- \* Odor control filter for exhaust.
- \* Maximum vacuum, 26" Hg.
- \* Maximum pressure, 15 psig.
- \* Extra heavy duty construction for many years of heavy use.
- \* Two 6" manways for cleanout, one on top, one down below.

The Conde ProVac Industrial Pumpout System is a powerful liquid waste pumping unit that pumps liquids and sludge at incredible speeds. Operating under the same principal as large pumping trucks, the ProVac use vacuum as its pumping engine. The ProVac pumps at an incredible 60 gallons per minute, is extremely quiet, and requires very little maintenance.

With a simple turn of a switch, the ProVac can be pressurized for off-loading of waste inside the tank. The Conde ProVac is an intelligent pumping alternative for locations not suitable for dragging in large hoses. It is ideal for servicing grease traps in restaurants which may be hard to get to, mall food courts or restaurants located on upper floors of buildings, remote portable toilets, machine sumps or any liquid waste pumping need.

## TECHNICAL SPECIFICATIONS

<b>Dimensions</b>	<b>24"W x 50" L x 46" H</b>
<b>Weight</b>	<b>Aluminum – 215 lbs. Steel - 315 lbs.</b>
<b>Motor Pump</b>	<b>1.5 hp, 110 volt, 13.4 FLA Conde Model 3</b>
<b>Operation Vacuum</b>	<b>18" Hg</b>
<b>Operation Pressure</b>	<b>5 psi</b>
<b>Intake flow rate</b>	<b>60 gpm</b>
<b>Pull down time</b>	<b>30 seconds</b>
<b>Finish</b>	<b>Aluminum – satin Steel - silver</b>

\* Custom colors available, contact factory

Side view of ProVac shows new large clean-outs on top and bottom as well as the thoughtful design.

Part No.	Description
LWUNP60	Steel
LWUNP60A	Aluminum

Everything on the ProVac is easy to get to and where it should be. All parts are designed to be easily serviced.
